# Retail Mobile POS
Mobile Point of Sale for Stores & Remote Events

Retail Mobile POS

FoundryLogic Retail Mobile POS runs on Apple mobile devices and is tightly integrated with the Retail Pro® 8 and Retail Pro® 9 retail management system. The app allows you to answer questions, provide personal service, and checkout customers "in-the-aisle" on your sales floor. Your customers will love the shopping experience you provide for them with Retail Mobile POS!

Retail Mobile POS Features:

- Real-Time: sales receipts are sent to Retail Pro in real-time
- Item Search: lookup item price and on-hand quantities
- View Items by Style Grid
- Show Product Images to Customers
- Customer Search: lookup Customers, change details, and add new Customers
- Add Discounts, Reason Codes, and Customer Price Levels
- Barcode Scanning: the app supports all sizes of Honeywell Captuvo and Infinite Peripherals sleds/scanners, also Apple MFi certified external Bluetooth scanners, and Apple's built-in camera
- Tenders: process Cash, Credit Cards, and Multiple Tenders
- Payments: EMV Credit Card processing and Point-to-Point Encryption (P2PE) managed by the Payment Provider. Gift Card support and Manual Credit Card entry.
- Digital Signatures: capture digital credit card signatures on-screen in the app
- Email and Print: email receipts and print to network receipt printers in your store
- Sales Orders and Held Receipts: accept Sales Order Deposits and Create Sales Orders by SO Type. With Retail Pro 9, you can also send Held Receipts to Retail Pro
- Centralized Management: configure your Apple devices, receipt handling, and the Mobile POS system setup in your store through Retail Mobile Manager, our System Administration console installed on your Retail Pro server or workstation

Free Trial

Retail Mobile POS is a free download from the App Store. Install the app on your Apple iOS 6.1 (or later) device and try it using our demo server on the Internet. On our website (www.foundrylogic.com), register for a Free Trial to access our Retail Mobile POS Demo & Tutorial Guide document. The tutorial document will show you how to easily connect to our Internet demo server, and it also provides screenshots and a step-by-step walk through of popular features in the app.

Purchase Information

Contact your Retail Pro Business Partner™ to install FoundryLogic Retail Mobile POS in all your stores!

A complete Retail Mobile POS software installation includes:
- Retail Mobile POS app running on your Apple iOS 6.1 (or later) devices
- Retail Mobile Manager, our system administration console, running on your store network
- Retail Mobile Services, our network "server," running on your store network
- You must also be using the Retail Pro 8 or Retail Pro 9 point of sale system

About FoundryLogic LLC

FoundryLogic LLC is a Retail Pro Development Partner™. FoundryLogic has been developing and supporting mobile apps for the Retail Pro point of sale system since 2004. Our first app was Retail Mobile Inventory, which collects inventory transactions on handheld devices and is widely used by merchants around the world. Please see our website for more information: www.foundrylogic.com
